SYSTEMS AND COMPUTERS IN JAPAN

CONTENTS FOR 1991

Page

NUMBER 1

Qian Ping Gu and Akira Maruoka. Learning Boolean Functions 1

Hiroaki Kaminaga, Kaoru Takahashi, Norio Shiratori, and Shoichi Noguchi. An Equivalence in LOTOS and Its Decision Method 10

Naofumi Takagi and Shuzo Yajima. An On-Line Error-Detectable High-Speed Array Divider . . . 21

Takao Ozawa. An Efficient Compensation-Path Finding Algorithm for a Large-Scale Processor Array 28

Takashi Naritomi, Hirotomo Aso, and Masayuki Kimura. A Fast Processor for 3-D Device Simulation Using Systolic Arrays 39

Kenji Kanayama, Yoshimasa Fujikawa, and Koichi Fujimoto. Development and Application of Vehicle-License Number Recognition System Using Real-Time Image Processing 49

Hao Ying Li, Yoshikazu Ueda, and Naohiro Ishii. Improved Complex Demodulation Method for Frequency Analysis 59

Norishige Chiba and Kazuhito Yaegashi. A Fast Algorithm for Determining the Insolation at the Surface of the Earth 67

Yoichi Seto, Akira Tsuboi, Nobuo Hamano, and Fuminobu Komura. Interpolation Algorithm for Unequally Spaced Image Data with Image Quality Correction Capability 76

Minoru Fukumi, Sigeru Omatu, and Masaru Teranishi. A New Neuron Model "CONE" with Fast Convergence Rate and Its Application to Pattern Recognition 91

Yasuhiro Minami, Hidefumi Sawai, and Masanori Miyatake. Large-Vocabulary Spoken Work Recognition Using Time-Delay Neural Network Phoneme Spotting and Predictive LR-Parsing 99

NUMBER 2

Nobuyasu Kanekawa, Hideo Maejima, Hatsuhiko Kato, and Hirokazu Ihara. Fault-Tolerant Computer System with Stepwise Negotiating Voting 1

Takeshi Kasuga, Michitaka Kameyama, and Tatsuo Higuchi. Design of a Robust Fault-Tolerant Multiplier 10

Hiroshi Ohtera, Shigeru Yamada, and Hiroyuki Narihisa. Software Reliability Growth Model for Testing-Domain 19

Page

Hiroaki Yamamoto. Note on the Efficiency of Methods to Generate Quasi-Random Sequences . . . 25

Kenichi Takahashi and Naohiro Ishii. Restoration of Images with Missing Pixels 34

Mikio Shinya and Tokiichiro Takahashi. Theories and Error Analysis of Pencil Tracing 42

Akio Utsugi and Masatoshi Ishikawa. Learning of Linear Associate Mapping by Latticed Network Circuits 56

Hiroyuki Kudo and Tsuneo Saito. Tomographic Image Reconstruction from Incomplete Projection Data by the Method of Convex Projections 66

Tatsuo Nozokido, Takashi Onodera, and Etsuji Yamamoto. Effects of Main Magnetic Field Time-Variation upon MR Images in Permanent Magnet MRI System 76

Toshiyuki Gotoh, Yukihiro Nakagawa, Morito Shiohara, and Masumi Yoshida. A Compression Algorithm for Medical Images and Display with the Decoding Function 85

Kiyotoshi Matsuoka. An Approach to the Generalization Problem in the Backpropagation Method . 97

NUMBER 3

Yoshiaki Kakuda and Yasushi Wakahara. Distributed Collection of Message Exchange Sequences in Each Process for Efficient Recovery from Protocol Errors 1

Yukinori Ikegawa, Masafumi Yamashita, and Tadashi Ae. An Experimental Evaluation of Leader Election Algorithms for Ring Networks 10

Minoru Ito and Tadao Kasami. Optimizing Universal Queries in Relational Databases 19

Kentarou Yamagishi, Katsuhiko Sakaue, Kazuhiko Yamamoto, and Hitoshi Matsubara. A Method to Detect Distinctive Features from Boundary Data 31

Yoshiyuki Okuyama, Yoshiki Kobayashi, Hiroshi Takenaga, Kazuyoshi Asada, and Kazunori Fujiwara. A High-Speed Labeling Algorithm for Raster-Scanned Type 43

Haruo Hoshino, Nobuyuki Hiruma, Mitsuho Yamada, and Tadahiko Fukuda. Relation between Visual Effects and Gain of Motion Parallax 56

Koichi Sasakawa, Shin-ichi Kuroda, and Shigeki Ikebata. A Method for Threshold Selection in Binary Images Using Mean Adjacent-Pixel Number 66

Shigehiro Fukushima and Takeshi Okumura. Extraction of the Symmetric Pairs of Contour Points as Well as the Medial Axis from a Planar Figure by a Method Based on Plane Division . . 74

Mitsuo Komura and Akio Tanaka. Learning and Production of Speech Pattern Using Multilayer Neural Networks 82

Yasuzo Suto and Kentaro Furuhata. An Algorithm for Removing Selections of Bone From X-Ray CT Models 94

Page

NUMBER 4

Neng-Fa Zhou, Toshihisa Takagi, and Kazuo Ushijima. Bidirectional Inference of Mode Information for Logic Programs 1

Seishiro Turuho, Hajime Nakatani,and Juniti Gohara. A Highly Reliable Large-Scale Computer Complex 10

Masahiro Sowa, Takaya Arita, Tadaaki Kawamura, and Hiromitsu Takagi. Parallel Execution on the Function-Partitioned Processor with Multiple Instruction Streams 22

Hideo Ito and Nobuyuki Suzuki. A Hypercube Design on Wafer-Scale Integration 29

Takashi Matsumura, Hiroyuki Seki, Mamoru Fujii, and Tadao Kasami. The Generative Power of Multiple Context-Free Grammars and Head Grammars 41

Takaaki Akimoto, Kenji Mase, and Yasuhito Suenaga. Improved Pixel Selected Ray Tracing . . . 57

Hiroyuki Yamamoto and Hideyuki Tamura. A Model-Based Approach to Localizing Stable Polyhedra Using Geometric Constraints 68

Fumihiko Yano and Yoshiaki Toyoda. Multistage Signal Extraction Method with Spline Filter . . . 77

Kazuo Chinone, Naoko Kasai, Shogo Kiryu, Masao Koyanagi, Hisasi Kado, Masakazu Nakanisi, and Shin Kosaka. An Integrated DC SQUID Gradiometer for Biomagnetic Application 88

Jian-Tong Wu, Shinichi Tamura, Hiroshi Mitsumoto, Hideo Kawai, Kenji Kurosu, and Kozo Okazaki. Speaker-Independent Vowel Recognition Combining Voice Features and Mouth Shape Image with Neural Network 100

NUMBER 5

Tetsuji Kobayashi. Deadlock Prevention and Avoidance Methods Using Timestamps for Locking Control in Distributed Database Systems 1

Nobuhiro Tomabechi. A Defect Recovery Method for ULSI/WSI Arithmetic Operation Systems Based on Residue Number Systems 13

Tsutomu Ishikawa. Hypercube Architecture with Bus Connections for Improving Communication Efficiency 21

Satoshi Okawa and Sadaki Hirose. Subclasses of Linear Context-Free Languages and Homomorphic Characterizations of Languages 30

Takashi Watanabe and Toshihiro Shibata. Detection of Broken Ellipses by the Hough Transforms and Multiresolutional Images 39

Shigeo Morishima, Shin'ichi Okada, and Hiroshi Harashima. A Facial Motion Synthesis for Intelligent Man-Machine Interface 50

Shinichi Satou, Koichi Sano, Tetsuo Yokoyama, and Hideaki Koizumi. High-Precision T_1 Imaging Method for Magnetic Resonance Imaging 60

Page

Atsushi Nomura, Kazutoshi Koga, and Hidetoshi Miike. Extracting Depth-Information from Dynamic Image by Spatio-Temporal Correlation Analysis 70

Mutsuo Sano, Shinichi Meguro, and Akira Ishii. Gray-Level Image Recognition Based on Multiple Cell Features 81

Naonori Ueda and Satoshi Suzuki. A Matching Algorithm of Deformed Planar Curves Using Multiscale Convex/Concave Structures 94

NUMBER 6

Takayuki Ito, Kunihiko Fukushima, and Sei Miyake. Examination of Implementing a Neural Network on a Parallel Computer—NEOCOGNITRON on NCUBE 1

Tadashi Ohmori, Masaru Kitsuregawa, and Hidehiko Tanaka. Concurrency Control of Bulk Access Transactions on a Parallel Disk Database Machine 10

Yoshinori Yamamoto and Shiro Fujita. Fuzzy Majority Functions 21

Toshio Kawashima, Yoichi Shirakawa, and Yoshinao Aoki. Object Identification Based on Uncertain Sparse Sensor Information 33

Toshikazu Wada, Yi He Gu, and Makoto Sato. Scale-Space Filtering for Periodic Waveforms . . . 45

Hiromitsu Yamada. Map Matching—Elastic Shape Matching by Multiangled Parallelism 55

Kenji Mase and Alex Pentland. Automatic Lipreading by Optical-Flow Analysis 67

Haruo Yoda, Takafumi Miyatake, and Hitoshi Matsushima. A Kinematic Model with a Self-Learning Capability of a Series of Motions Based on Instinctive Incentive 77

Koh Kakusho, Seiichiro Dan, Norihiro Abe, Tadahiro Kitahashi, and Sei Miyake. An Application of Neural Networks to Three-Dimensional Interpretation of an Image 87

Masazumi Katayama and Mitsuo Kawato. A Parallel-Hierarchical Neural Network Model for Motor Control of a Musculo-Skeletal System 95

NUMBER 7

Isamu Shioya and Katsuhiko Nakamura. Logic Hypergraph Grammars and Context-Free Hypergraph Grammars 1

Shugang Wei, Michitaka Kameyama, Tatsuo Higuchi. Performance Evaluation of a Multivalued RSA Encryption VLSI 12

Takeshi Kumagai, Naoto Sugai, and Masayuki Takakuwa. Access Methods of a Two-Dimensional Access Memory by Two-Dimensional Inverse Omega Network 22

Akihiro Shimizu. A Dynamic Password Authentication Method Using a One-Way Function 32

Kazuhisa Takagi, Noboru Ohnishi, and Noboru Sugie. A Method for Recovery of the 3-D Structure and Motion of Objects from Low-Accuracy Dynamic Images 41

Page

Jun-ichi Hasegawa, Taketoshi Tsutsui, and Jun-ichiro Toriwaki. Automated Extraction of Cancer Lesions with Convergent Fold Patterns in Double Contrast X-Ray Images of the Stomach . 51

Koji Komatsu. 3-D Shape Reconstruction of Human Face from a 2-D Facial Image and Provision for Change of Expression 63

Hiroshi Matsushita, Yoshihiro Mori, and Toshio Inui. Hierarchical Shape Description Using Skeletons and Hierarchical Shape Discrimination by Neural Networks 75

Tatsuya Kawahara, Shuji Doshita, and Shigeyoshi Kitazawa. Speaker-Independent Consonant Recognition by Integrating Discriminant Analysis and HMM 84

Toru Abe, Hirotomo Aso, and Masayuki Kimura. Automatic Identification of Human Faces by 3-D Shape of Surfaces—Using Vertices of B-Spline Surface 96

NUMBER 8

Jungho Park, Toshimitsu Masuzawa, Ken'ichi Hagihara, and Nobuki Tokura. Efficient Distributed Algorithms Solving Problems about the Connectivity of Network 1

Fei Qian and Hironori Hirata. A Flow Control Algorithm for Computer Networks with Two Teacher Learning Automata 17

Hayato Yamana, Jun Kohdate, Toshiaki Yasue, and Yoichi Muraoka. An Environment for Dataflow Program Development of Parallel Processing System—Harray 26

Toshio Matsunaga and Yoshimi Fukumura. Performance Analysis of Multiprocessor Systems with Bus Architecture 39

Takashi Watanabe and Toshihiro Shibata. Detection of Broken Ellipses by the Hough Transforms and Multiresolutional Images 48

Shigeru Kimura and Shinji Ozawa. Edge Surface Detection with Subvoxel Accuracy from 3-D Images 59

Masaki Watanabe, Yuichi Ohta, and Katsuo Ikeda. A Parallel Processing Architecture for Image Understanding 68

Hiroyuki Yasuda, Kazuhisa Ando, Noboru Ohnishi, and Noboru Sugie. Extracting Physically Nonexistent Contours 78

Hiroyuki Morikawa and Hiroshi Harashima. Image Sequence Coding Using 3-D Structure and Motion Information 87

Shoji Mizuno. Efficient Facsimile Data Reduction by Thinning Process 97

NUMBER 9

Tsutomu Matsumoto, Youichi Takashima, and Hideki Imai. Construction and Evaluation of the Identity Transformers for Cryptographic Key Distribution 1

Satoshi Horiike. A Task Mapping Method for a Hypercube 14

Page

Takashi Sato. Order Preserving Code Having a Search Tree 23

Seiji Kajihara, Noriyoshi Itazaki, and Kozo Kinoshita. Stuck-Open Faults Test Generation for CMOS Combinational Circuits 33

Teruhiko Yamada and Kouji Yamazaki. Method of Diagnosing Single Bridging Faults in Combinational Circuit 43

Manas Sangaworasil, Kouichi Kojima, Kiyoaki Atsuta, and Shozo Kondo. Estimation of 3-D Shape from Shading by Using a Constraint at Zero-Crossing 52

Kenji Doya and Shuji Yoshizawa. Neural Network Model of Temporal Pattern Memory 61

Yoshihiko Nomura, Michihiro Sagara, Hiroshi Naruse, and Atsushi Ide. Edge Location to Subpixel Precision and Analysis 70

Michio Okada and Masaki Kohda. Word Spotting System Based on Stochastic Models of Phonemic Segments 82

Katsumi Mori, Kazuo Kawakubo, and Jun-ichi Ikenoue. Quadratic Curve Detection by Sampling Manner 94

NUMBER 10

Kazutomo Yunokuchi and Tetsuya Furukawa. An Internal Environment State Variable in the Human Body and Fundamental Experiments 1

Toshiyuki Maeda, Yoichiro Sato, Tokumi Yokohira, and Takuji Okamoto. Decentralized Priority Encoder and Its Application 9

Masaki Hashizume and Takeomi Tamesada. Fault Detectioin of TTL Combinational Circuits Based on Supply Current 18

Masami Ogata and Takao Sato. Motion Perception Model with Interaction between Spatial Frequency Channels 30

Satoru Morita, Toshio Kawashima, and Yoshinao Aoki. Pattern Matching of 2-D Shape Using Hierarchical Descriptions 40

Mutsumi Watanabe, Kazunori Onoguchi, Yoshinori Kuno, and Haruo Asada. Obstacle Detection by Disparity Prediction Stereopsis Method 50

Yukihiro Nakagawa, Toshiyuki Yoshitake, Morito Shiohara, Toshiyuki Gotoh, and Masumi Yoshida. A Compression adn Reconstruction System for Medical Images 61

Tadasu Uchiyama and Katsunori Shimohara. A Realtime Learning Algorithm for Recurrent Neural Networks 73

Qi Jia, Naohiro Toda, and Shiro Usui. A Study on Initial Value Setting of the Back-Propagation Learning Algorithm 80

Yutaka Hisanaga, Masafumi Yamashita, and Tadashi Ae. Set Partition of Real Numbers by Hopfield Neural Network 88

Page

Yoshinaga Kato, Yasuo Tan, and Toshiaki Ejima. A Comparative Study with Feed-forward PDP Models for Alphanumeric Character Recognition 96

Kazunori Kotani and Makoto Miyahara. Objective Picture Quality Scale by Neural Network Fed the Distortion Factors to the Input Layers 104

NUMBER 11

Hiroki Honda, Satoshi Mizuno, Hironori Kasahara, and Seinosuke Narita. Parallel Processing Scheme of a Basic Block in a Fortran Program on OSCAR 1

Hideo Kitagawa, Fumio Matsuda, Yoshiki Uchikawa, and Shuzo Hattori. Multiprocessor Scheduling Algorithm with Communication Time 14

Teruhiko Yamada, Shuji Hamada, Tatsuo Matsumoto, Toshihiko Takahashi, and Takao Nakayama. Method of Diagnosing Multiple Stuck-at-Faults in Combinational Circuits 21

Kiyotoshi Matsuoka. Learning of Neural Networks Using Their Adjoint Systems 31

Tatsuhiro Yonekura, Shigeki Yokoi, and Jun-ichiro Toriwaki. A Method of Information Integration by Multilayer Neural Networks and Its Theoretical Study 42

Atsuhisa Saito, Koichi Ogawa, and Masato Nakajima. Optimum Contrast Enhancement Using Fuzzy Sets 52

Kunio Fukunaga, Takeshi Asano, Hideto Murata, and Masao Izumi. Image Matching Using Structures of Edge-Image Graphs 61

Noboru Niki, Yoshiki Kawata, and Hitoshi Satoh. A 3-D Display Method of Fuzzy Shapes Obtained from Medical Images 72

Norishige Chiba, Keimei Kaino, Seiichi Wada, and Kazunobu Muraoka. A Behavioral Model of Cracks and Its Application to CG 82

Jiang-Qian Ying and Noboru Sugie. A Point-Inclusion Algorithm for a Domain with Boundary Composed of Algebraic Curve Segments 92

Hidegi Matsushima, Mutsuhiro Terauchi, Toshio Tsuji, and Koji Ito. Extraction of Surface Orientation from Texture Using the Gray Level Difference Statistics 100

NUMBER 12

Taisuke Boku, Tomohiro Kudoh, Hideharu Amano, and Tetsuro Kimura. NCC: A Concurrent Description Language for Scientific Calculation on Multiprocessors 1

Toshimitsu Masuzawa, Naoki Nishikawa, Ken'ichi Hagihara, and Nobuki Tokura. A Fault-Tolerant Algorithm for Election in Complete Networks with a Sense of Direction 11

Hiroki Honda and Hironori Kasahara. Coarse Grain Parallelism Detection Scheme of a Fortran Program 24

Page

Tomohiro Yoneda, Yoshihiro Tohma, and Yutaka Kondo. Acceleration of Timing Verification Method Based on Time Petri Nets 37

Hiroyuki Yamaguchi, Yasushi Tatehiro, Kenji Akiyama, and Yukio Kobayashi. Data Compression and Depth Shape Reproduction of Stereoscopic Images 53

Hiroshi Sakou, Hitoshi Matsushima, and Masakazu Ejiri. Texture Discrimination Using Self-Organized Multiresolution Filtering 65

Minoru Etoh, Akira Tomono, and Fumio Kishino. Stereo-Based Description by Generalized Cylinder Complexes from Occluding Contours 79

Yasushi Yagi and Shinjiro Kawato. Position-Mesuring Method Using Omnidirectional Image Sensor with Conic Mirror 90

Yuji Iwahori, Hidezumi Sugie, and Naohiro Ishii. Photometric Stereo Under Illumination from Unknown Zenith Angles 99

NUMBER 13

Yumi Fukushima and Yoshihide Igarashi. Efficient Algorithms for Realizing a Layout of Complete Binary Trees 1

Haesool Yang, Yoshihiro Tsujino, and Nobuki Tokura. The Complexity Measure of Program Based on the Inter-Module Dependency. 10

Liya Ding and Masao Mukaidono. A Proposal on Approximate Reasoning Based on Revision Principle and Fixed Value Law. 20

Makoto Tabei, Hiroshi Yamamoto, and Mitsuhiro Ueda. Backprojection with Fourier Series Expansion and FFT. 28

Yoshinori Okamoto. Neural Network Model for Realtime Adaptation to Rapidly Changing Environments. 39

Masafumi Nishimura. Speaker Adaptation Method for Fenonic Markov Model-Based Speech Recognition. 47

Shigeo Morishima, Seiji Kobayashi, and Hiroshi Harashima. A Realtime Model-Based Facial Image Synthesis Based on Multiprocessor Network. 59

Tsutomu Horikoshi and Hisashi Kasahara. Superquadrics for 3-D Shape Indexing Language. 70

Hiroyuki Yamada and Yoshikazu Tezuka. Functional Model-Based Assistance for Modifying Software. 82

Yuuichi Sakuraba, Takamichi Nakamoto, and Toyosaka Moriizumi. New Method of Learning Vector Quantization Using Fuzzy Theory. 93

M. Ohta, A. Ikuta, Y. Mitani, Y. Kodera, M. Ogawa, M. Fujita, and T. Wada. A Restoration Method of Medical X-Ray Images Based on an Extended Regression Analysis Method. 104

NUMBER 14

Page

Takao Tenma, Yasuomi Sato, Yasuhiko Morimoto, Minoru Tanaka, and Tadao Ichikawa. A Modification Support System—Automatic Correction of Side Effects Caused by Type Modifications 1

Toshio Matsuura, Hajime Naota, and Makoto Nakamura. A Drawing Editor Key 3 with Capabilities of Defining Figure Parts and Preserving Connection/Inclusion Relationships 14

Takeshi Kaneko and Takeshi Nakajo. Extraction of Transformations to be Tested from the Structured External Functional Specification 26

Kenji Moriyasu, Terunao Soneoka, and Yoshifumi Manabe. Global States Monitoring Algorithm for Distributed System 45

Ryuichi Suzuki, Akihide Hashizume, Shinji Yamamoto, and Ryouhei Yabe. Image Processor for Automated Classification of White Blood Cells 57

Takuto Joko, Koji Ito, Toshio Tsuji, and Mutsuhiro Terauchi. A Linear Algorithm for Motion of Rigid Objects Using Features of Parallel Lines and Optical Flow 70

Jianqiang Yi, Shuichi Kurogi, and Kiyotoshi Matsuoka. Back-Propagation Learning of Neural Networks for Translation Invariant Pattern Recognition 80

Noboru Kanedera and Tetsuo Funada. Phoneme Recognition with Elliptic Discrimination Neural Units 90
